

Torch set for shrinking and soldering operated by propane or butane gas.
Main applications: Installation of cables, closures and tubes, corrosion protection

Characteristics of the RBS

- Easy and reliable handling
- Variable securable adjustment of the flame by means of sliding collar
- Long working life and excellent operating security is ensured by using high quality materials and precision components.

A high safety standard is reached by means of an automatic adjustment of the working flame to a small flame when releasing the handle. The handle as well as the mounting/hanging device correspond to the safety rules. The torch has been tested for safety according to DIN – DVGW.
