

The cable cutter KS is used for cutting telecommunication cables. By lifting up the top of the KS the cut can be carried out at every point of the cable.

Characteristics of the KS

- Simple handling
- High application range up to 90 mm cable-Ø
- Flush cut, no pull out of conductors
- Toll is used on non cut cables, too

Short description

Ordering information

Short description

The cable cutter is positioned around the cable by lifting its upper part. On turning the spindle the blade makes a flush cut. Since only a minimum of force is required the cutting of the cables is very simple. The blade is replaceable.
